

Magic Dino,

My children want me to tell you what a talented Dinasaour you are to make their artwork come to life. They have many questions for you about your animation magic and have already discovered you Kid's Corner at the site. I will let them investigate further.....I mainly want to thank you for the **magic that you have brought to our home.** I saw it begin to take effect when my children gave me their artwork to send to your site, and when they were asked to Title it. So much thought and importance was put on just that little element. They were so excited to receive their animations and shifted for their place in line to view them (I have 3 children) . It was a wonderful experience to see the pride and amazement, in each child, as they viewed their animation. It far surpassed the blue ribbon that the 3rd grade art fair gave my son or the A+ that my high scholar received for her drawing...or the highly honored refrigerator magnet gallery. They had never seen anything like this before. They have been playing their animations over and overwe have downloaded our screensavers, on both of our at home computers, and have had proud Aunts, Uncles, and Grandparents download the screensavers, from their animations, from your website (which was very user friendly.....even for someone who isn't computer savvy). I could go on to include everyone's reaction, who has experienced this, but it is simply indescribable and I want to thank you wholeheartedly from my children and myself. Thank you! You are quite the DinasaourBarney who?

Sincerely,
Lacey Fox
